## Practical – III

|                             |                                  |
|-----------------------------|----------------------------------|
| Roll No.:T049               | Name:Vijaylaxmi Vishwakarma      |
| Class:TYIT                  | Batch:1                          |
| Date of Assignment:10/07/26 | Date/Time of Submission:10/07/26 |

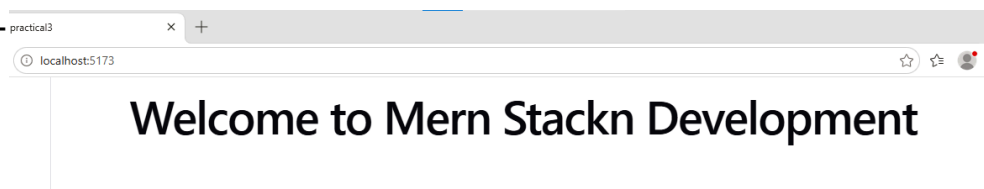

### 3.React Introduction and JSX

a. Create a React application using Vite/CRA and display “Welcome to MERN Stack Development”.

**Code:-**

```
App.jsx x
practical3 > src > App.jsx > default
1 function App() {
2   return (
3     <div>
4       <h1>Welcome to Mern Stackn Development</h1>
5     </div>
6   );
7 }
8 export default App
```

**Output:-**

b. Display dynamic data using JSX.

**B1.Code:-**

```
App.jsx x
practical3 > src > App.jsx > App
1 function App() {
2   const emp = "Vijaylaxmi";
3   const dept = "IT";
4   const sal = 50000;
5
6   return (
7     <div>
8       <h1>Employee Details</h1>
9       <p>Name : {emp}</p>
10      <p>Department : {dept}</p>
11      <p>Salary : ₹{sal}</p>
12    </div>
13  );
14 }
15
16 export default App;
```

Output:-

---

# Employee Details

Name : Vijaylaxmi

Department : IT

Salary : ₹50000

B2 Code:-

```
App.jsx ×
practical3 > src > App.jsx > App
1  function App() {
2      const studentName = "Vijaylaxmi";
3      const totalClasses = 60;
4      const attendedClasses = 54;
5      const attendance = (attendedClasses / totalClasses) * 100;
6      return (
7          <div>
8              <h1>Attendance Dashboard</h1>
9              <hr />
10
11             <p>Name : {studentName}</p>
12             <p>Total Classes : {totalClasses}</p>
13             <p>Classes Attended : {attendedClasses}</p>
14             <p>Attendance : {attendance.toFixed(2)}%</p>
15
16             <h3>
17                 Status : {attendance >= 75 ? "Eligible for Exam" : "Not Eligible"}
18             </h3>
19         </div>
20     );
21 }
22 export default App;
```

Output:-

---

# Attendance Dashboard

Name : Vijaylaxmi

Total Classes : 60

Classes Attended : 54

Attendance : 90.00%

**Status : Eligible for Exam**

c. Declare variables and write a function to calculate the sum of two numbers and display the result.

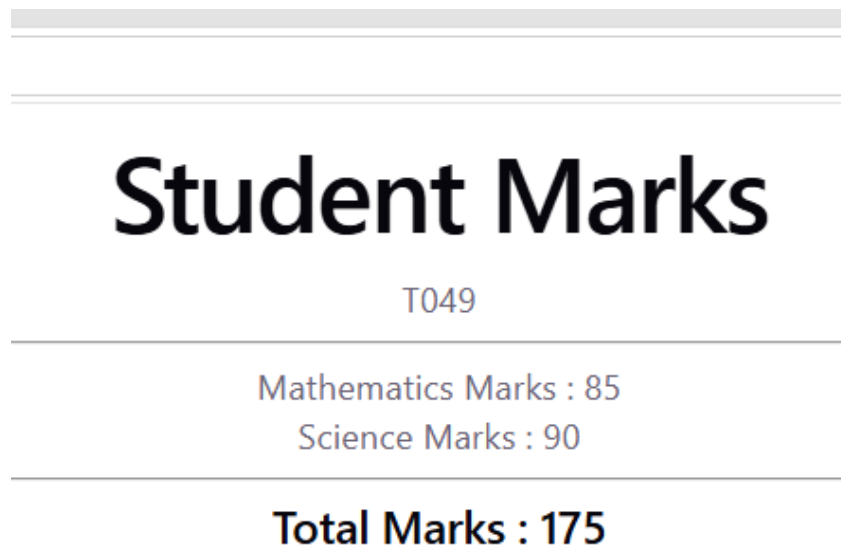

**Code:-**

```
Terminal  Help  App.jsx - MERN - Visual Studio Code

App.jsx  X

practical3 > src > App.jsx > App
1  function App() {
2    const maths = 85;
3    const sci = 90;
4    function calculate(mark1, mark2) {
5      return mark1 + mark2;
6    }
7
8    return (
9      <div>
10       <h1>Student Marks</h1>
11       <p>T049</p>
12       <hr />
13       <p>Mathematics Marks : {maths}</p>
14       <p>Science Marks : {sci}</p>
15       <hr />
16       <h2>Total Marks : {calculate(maths, sci)}</h2>
17     </div>
18   );
19 }
20 export default App;
```

**Output:-**

d. Apply basic CSS styling to a React component

**Code:-**

**App.Jsx:-**

```
import './App.css';

function App() {
  return (
    <div className="container">
      <h1>Student Dashboard</h1>
      <hr />
      <p>Name : Rahul Sharma</p>
      <p>Roll Number : 101</p>
      <p>Course : MCA</p>
      <p>Semester : III</p>
      <button>View Result</button>
    </div>
  );
}

export default App
```

**App.Css:-**

```
.container {
  width: 700px;
  margin: 50px auto;
  padding: 20px;
  border: 2px solid black;
  border-radius: 10px;
  background-color: whitesmoke;
  text-align: center;
  color: darkblue;
}

h1 {
  color: darkblue;
}

hr {
  margin: 20px 0;
}

p {
```

```

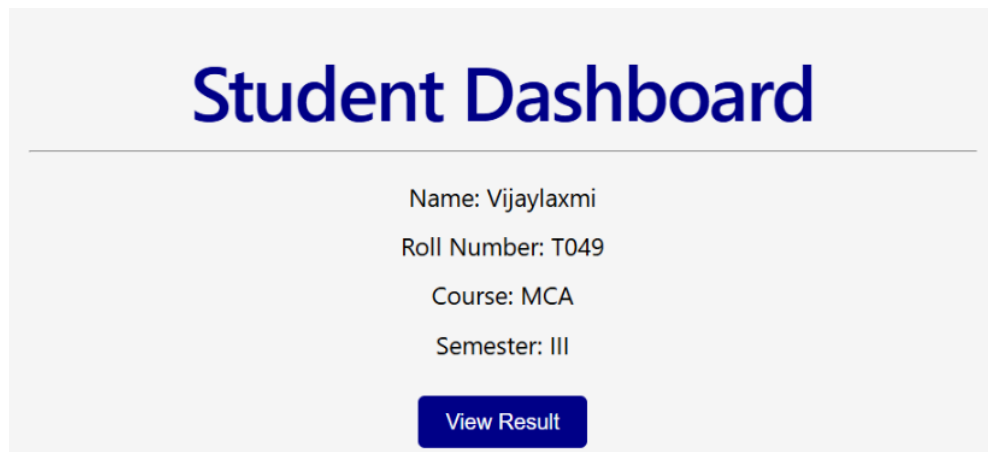

font-size: 18px;
color: black;
margin: 10px 0;
}

button {
padding: 10px 20px;
font-size: 16px;
background-color: darkblue;
color: white;
border: none;
border-radius: 5px;
cursor: pointer;
margin-top: 15px;
transition: background-color 0.2s ease;
}

button:hover {
background-color: #0000aa;
}

```

**Output:-**

e. Create a simple functional component and render it in [App.js](#).

**Code:-**

**App.Jsx:-**

```

1  import Student from "../components/Student";
2
3  function App() {
4    return (
5      <div>
6        <h1>This is functional component practice</h1>
7        <hr />
8        <Student />
9      </div>
10   );
11 }
12 export default App;

```

### Student.Jsx:-

```
1  function Student() {
2      return (
3          <div>
4              <h2>Student Component</h2>
5              <p> Name: Vijaylaxmi Vishwakarma</p>
6              <p>Course   : MCA</p>
7              <p>Semster  : III</p>
8          </div>
9      );
10 }
11 export default Student;
```

### Output:-

## This is functional component practical

### Student Component

Name: Vijaylaxmi

Course : MCA

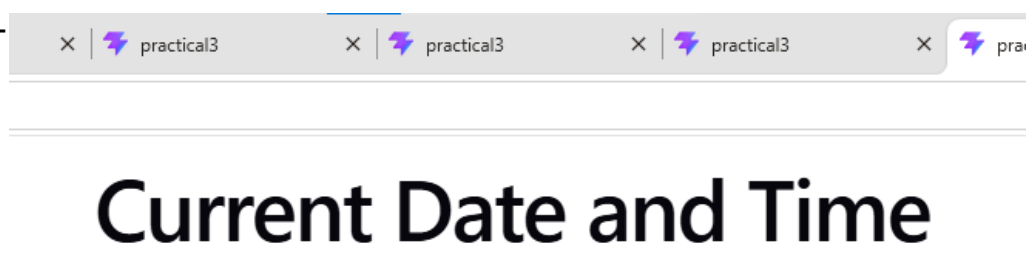

Semster : III

f. Create a React component that displays the current date and time dynamically using JavaScript.

### Code:-

```
App.jsx
practical3 > src > App.jsx > default
1  function App() {
2      // Create a Date object
3      const currentDate = new Date();
4
5      return (
6          <div>
7              <h1>Current Date and Time</h1>
8              <hr />
9              <p>Date : {currentDate.toLocaleDateString()}</p>
10             <p>Time : {currentDate.toLocaleTimeString()}</p>
11         </div>
12     );
13 }
14
15 export default App;
```

### Output:-

- **MVLU College Management System**

**Code:-**

**App.jsx:-**

```
src > App.jsx > default
1  import Header from "../components/header";
2  import Student from "../components/Student";
3  import Attendance from "../components/Attendance";
4  import Result from "../components/Result";
5  import Footer from "../components/Footer";
6
7  function App() {
8    return (
9      <div>
10         <Header />
11         <Student />
12         <Attendance />
13         <Result />
14         <Footer />
15       </div>
16     );
17   }
18   export default App;
```

**Header.jsx:-**

```
App.jsx  Attendance.jsx  Header.jsx X  Footer.jsx
src > components > Header.jsx > default
1  function Header() {
2    return (
3      <div>
4        <h1>M.V.L.U College Management System</h1>
5      </div>
6    );
7  }
8
9  export default Header;
```

**Footer.jsx:-**

```
src > components > Footer.jsx > default
1  function Footer() {
2    return (
3      <div>
4        <hr />
5        <p>2026 Sheth L.U.J college.</p>
6      </div>
7    );
8  }
9
10 export default Footer;
```

### Student.jsx:-

```
1  function Student() {
2      return (
3          <div>
4              <h2>Student Details</h2>
5              <p>Name: Vijaylaxmi </p>
6              <p>Course: BScIT</p>
7              <p>Semester: II</p>
8          </div>
9      );
10 }
11
12 export default Student;
```

### Attendance.jsx:-

```
1  function Attendance() {
2      const tc = 60;
3      const p = 35;
4      const at = (p / tc) * 100;
5
6      return (
7          <div>
8              <h2>Attendance</h2>
9              <p>Total Classes: {tc}</p>
10             <p>Present: {p}</p>
11             <p>Attendance: {at.toFixed(2)}%</p>
12         </div>
13     );
14 }
15
16 export default Attendance;
```

### Output:-

## M.V.L.U College Management System

### Student Details

Name: Vijaylaxmi  
Course: BScIT  
Semester: III

### Attendance

Total Classes: 60  
Present: 35  
Attendance: 58.33%

### Result

Total Marks: 278  
Percentage: 92.67%  
Grade: A+
